About RMC

We have own equipment like Batching Plants, Transit Mixers, Concrete Pumps & Tippers etc. along with Qualified & Experience staff. We have Business experience of more than 7 years in Ready Mix Concrete Industry with Dedicated Project Site Plants and as well as commercial Ready Mix Concrete supply plants with remarkable Logistic Solutions and Pumping Technology. we have a fleet of 52 transit mixers ,nine stationary pumps and one boom pump .

Product Grades

M10 GRADE

M15 GRADE

Mix ratio: 1:3:6 (1 cement, 3 sand and 6 aggregate)

Suitability: Used as PCC (Plain Cement Concrete) in the construction of levelling course, bedding for footing, concrete roads, etc.

Mix ratio: 1:2:4 (1 cement, 2 sand and 4 aggregate)

Suitability: Used as PCC (Plain Cement Concrete) in the construction of levelling course, bedding for footing, concrete roads, etc.

Different RMC's

There are three types of RMC that are available based on the proportion of ingredients that are mixed. These three are:

- Transit Mixed Concrete - This is also known as dry batched concrete, as all the ingredients are put directly into mixer. The drum of the mixer revolves at high speed during charging of ingredients and then at normal speed it keeps on rotating. You can mix the concrete at any place from site, yard or in transit.

- . Shrink Mixed Concrete - In it, an initial mixing of ingredients is already done at the plant or factory itself and then the remaining mixing is done in transit mixer. To determine how much mixing has to be done in a transit mixer, the test should be done and it should be kept in mind how much mixing was done at the plant.

- . Central mixed concrete - As the name suggests, the mixing of ingredients is thoroughly done at the plant itself and then it is loaded into the truck mixer, which acts as an agitator only.

Products Grade

Normal grade of concrete:

M5, M7.5, M10, M15, M20.

Standard grade of concrete:

M25, M30, M35, M40, M45.

High strength grade of concrete: M50, M55, M60, M65, M70.

Micro tech Mix: A mix high-strength concrete has high compressive strength and is appropriate for high-rise buildings, long-span bridges, ultra-thin white topping and constructions in coastal areas, etc.

Special Products: - Floor nation Mix

- Fiber Mix
- Enviro Mix

Our Vehicles: - TM'S-52

- PUMP'S-9
- BOOM PUMP-1

MRK Bricks

Your trusted manufacturer and supplier of high-quality bricks. With precision engineering, we deliver durable bricks that stand the test of time for all types of construction projects.
